CHI SIAMO

L'azienda RG S.r.l. ha una storia radicata, iniziando negli anni '80 dalla passione e determinazione di Roberto Gasparoni. Con un background come geometra, Roberto si è immerso nel mondo della bigiotteria, acquisendo competenze e abilità meccaniche autonomamente, per poi navigare attraverso sfide e opportunità che hanno modellato l'evoluzione dell'azienda.

Negli anni l'azienda è progredita, ampliando la produzione, spostandosi in nuove sedi, ed evolvendo con tecnologie avanzate e pratiche sostenibili. Dal concentrarsi sulla produzione di catena e l'acquisizione di macchinari essenziali, RG S.r.l. si è espansa nel settore promozionale e della moda, sempre mantenendo un impegno costante per la qualità e la precisione.

Con il tempo, l'innovazione è stata al centro dell'evoluzione dell'azienda, introducendo torni automatici e CNC, e investendo in tecnologia 4.0 per ottimizzare i processi produttivi. L'accento è stato posto sulla transizione ecologica, adottando pratiche come l'uso di olio biologico e macchinari sostenibili, sottolineando l'impegno dell'azienda verso la sostenibilità.

Ora guidata dalla seconda generazione, RG S.r.l. mira a mantenere e elevarsi oltre gli standard di qualità e precisione che ha sempre valorizzato, come evidenziato dalla certificazione di qualità ISO 9001:2015, continuando ad evolversi e innovarsi.
